Research and Development in Cognition
and People-centric Computing

People-centric solutions for an improved life experience

R&D Groups

siti

Informatics Systems and Technologies
Sistemas e Tecnologias Informáticas

<http://siti.ulusofona.pt>
sitimgt@gmail.com

SITI's vision relates to a simple and at a first glance disruptive approach: **nomadic people become the centre of the networking system**. Users on the move are part of communities and are both consumers and active providers of different Internet services, such as coordination of connectivity to different access networks.

Based on its vision, SITI has as mission to assist in demonstrating that user empowerment is a trend that should be looked into from a global Internet architecture perspective - focus on Internet science

ctip

Cognitive and Technology Intensive Psychology
Psicologia Cognitiva e Tecnologicamente Intensiva

<http://ctip.ulusofona.pt>
ctipmgt@gmail.com

CTIP brings together researchers in psychology with diverse skills and backgrounds which they apply to a common aim of enhancing or recovering people's ability to function well in daily life.

The main research agenda of this group falls within the scope of the interdisciplinary thematic line on Cyberpsychology, which it leads, and is focused on the development and assessment of technological tools to assess and treat anxiety disorders and cognitive impairments.

OPPORTUNITIES

C-BRAINS

Room U.0.5, Building U, University Lusófona
tuesdays, 14h-15h30.

Interdisciplinary seminars concerning Internet Science and Cyberpsychology.
Each seminar comprises a presentation by an invited speaker, and open discussion..
